

Kombi Line Stripers

Kombi Classic Line Striper

The Kombi provides crisp, well-defined lines and is electrically powered with an eight-hour battery.

It's easy to use — just add paint and water at your chosen dilution rate, select line width requirements from 1.5 to 4 inches. Turn on the switch and begin marking.

After use, flush the system with water from the rear tank and recharge the machine so it's ready for the next use. Paint can stay in the machine's reserve tank until the next application.

\$1645.00

(Includes wheeled knob)
